
ECSSO Magento Product Importer (XML & CSV) 1.2.x - 1.4.x

The Magento Product Importer (XML & CSV) Extension is a helpful module for eCommerce stores because by using the module, the store owner can import the product from any other application to magento web store

Steps for Installation

- 1) Extract the zip file ProductImport-XML.zip to any local folder in your machine.
- 2) Copy the all the files from the folder etc/modules/ to /app/etc/modules/ folder in your magento installation directory
- 3) Copy the folder in app/code/local/Ecsso to /app/code/local folder in your Magento installation directory
- 4) Copy all files from the folder app\design\adminhtml\default\default\template\system\convert\profile to app\design\adminhtml\default\default\template\system\convert\profile or your custom template folder in your Magento installation directory

NB: If the magento version is >=1.4.x rename the file

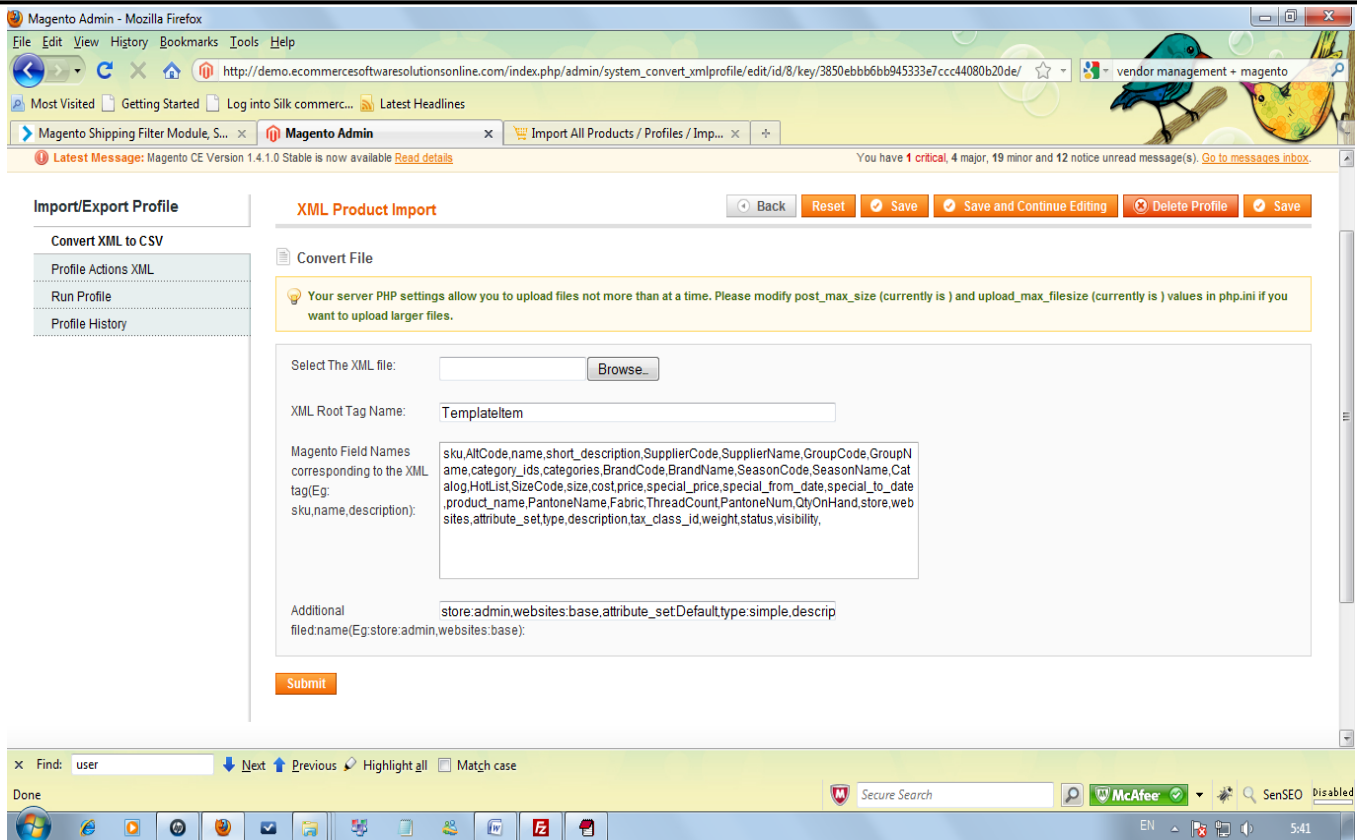

'app\code\local\Ecsso\Adminhtml\controllers\System\Convert\XmlprofileController1.4x.php' to 'XmlprofileController.php' and

\app\code\local\Ecsso\Adminhtml\Block\System\Convert\Xmlprofile\Run1.4x.php to Run.php and copy same files to same location in your magento installation folder.

After installing Magento Product Importer (XML & CSV) Extension, we can set details for Product Importer (XML & CSV) module through backend.

Go to System->Import/Export->Advanced XML Profile. If you have created any profiles using this module, it will be displayed here. Other wise

Click 'Add New Profile Button'. Click Convert 'XML to CSV' tab in the left side. Then it will open

Select the your xml file which is to be converted to Magento web store and provide the needed information in the input boxes, which is must for converting the data.

Select The XML file: Select your xml file. For E.g.:

```
<?xml version="1.0" standalone="yes"?>
<ItemsDataSet>
<TemplateItem>
<Sku>100091</Sku>
<AltCode />
<Name>SUMMER MIST Q/C SET</Name>
<LongDescription>=</LongDescription>
<SupplierCode>358</SupplierCode>
<SupplierName>LINEN HOUSE</SupplierName>
<GroupCode>1</GroupCode>
```

```
<GroupName>BEDDING</GroupName>
<ClassCode>120</ClassCode>
<ClassName>QUILT COVERS</ClassName>
<BrandCode>903</BrandCode>
<BrandName>SUMMER MIST BED LINEN</BrandName>
<SeasonCode>809</SeasonCode>
<SeasonName>SS 2009</SeasonName>
<Catalog>1</Catalog>
<HotList />
<SizeCode>1</SizeCode>
<SizeName>SING</SizeName>
<Cost> 38.25</Cost>
<Price> 109.95</Price>
<SpecialPrice> 76.97</SpecialPrice>
<SpecialPriceStart>1/04/2010</SpecialPriceStart>
<SpecialPriceEnd>28/04/2010</SpecialPriceEnd>
<WEBName>SUMMER MIST Quilt Cover SET</WEBName>
<PantoneName />
<Fabric />
<ThreadCount />
<PantoneNum />
<QtyOnHand>39</QtyOnHand>
</Templateltem>
</ItemsDataSet>
```

XML Root Tag Name: The root tag name in the xml file in which the data contains. For Eg: 'Templateltem'

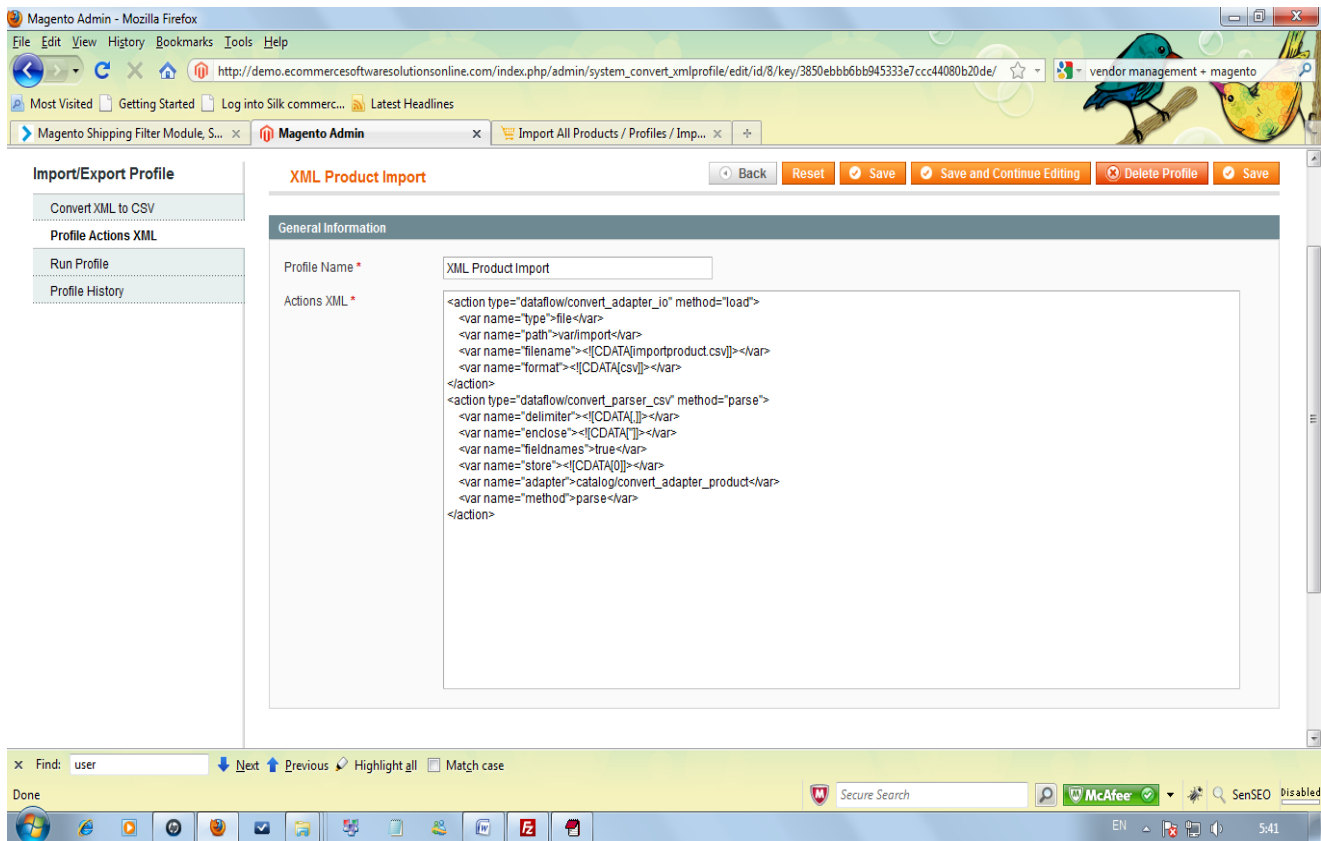

Magento Field Names corresponding to the XML tag(Eg: sku,name,description): Specify the magento database field name corresponding to tag names in the xml file. For Eg:

sku,AltCode,name,short_description,SupplierCode,SupplierName,GroupCode,GroupName,category_ids,categories,BrandCode,BrandName,SeasonCode,SeasonName,Catalog,HotList,SizeCode,size,cost,price,special_price,special_from_date,special_to_date,product_name,PantoneName,Fabric,ThreadCount,PantoneNum,Qty OnHand,store,websites,attribute_set,type,description,tax_class_id,weight,status,visibility,

Additional filed:name(Eg:store:admin,websites:base): It is additional fields which are needed to add to CSV file which is must for Magento Data import and is not present in the xml file. The format should be like that 'magento fieldname: value;' (each data can be separated by semi colon). For Eg: if 'store', which required field is not present in xml file , it should specified in the box. Because it is must for magento product. In the above xml example some required fields in magento is missing. So we have to add these through this box. For Eg:

store:admin,websites:base,attribute_set:Default,type:simple,description:,tax_class_id:None,weight:0,status:Enabled,visibility:Catalog

After filling data, and submit the form. It will convert the XML to CSV and will display the corresponding message. Then select the 2nd tab 'Profile Actions XML'. Fill the form with corresponding details.

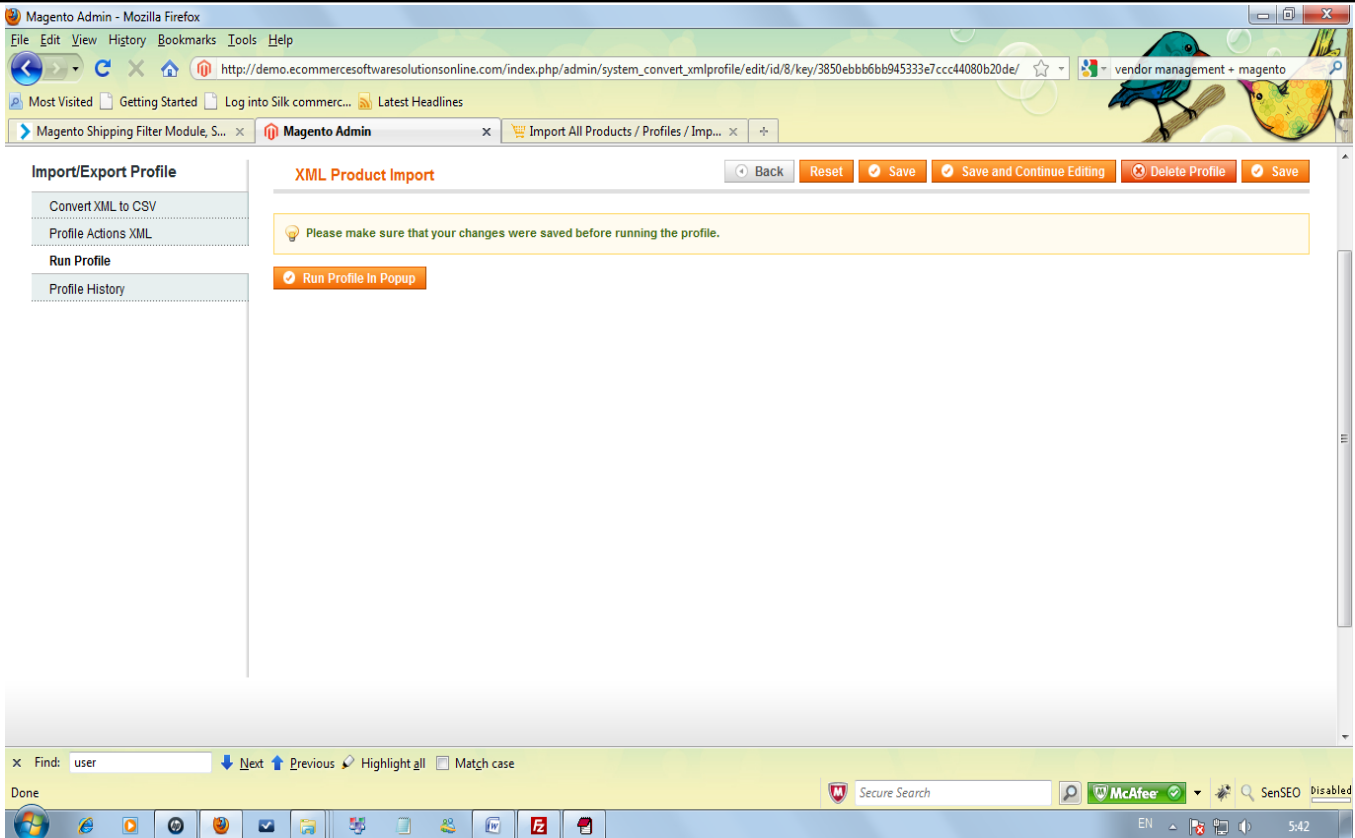

Profile Name: Enter the name of the profile, which used for further use.

Actions XML : It is same as xml which is used in Magento data Import.

Please use this following xml here. You can customize the xml as per your need.

```
<action type="dataflow/convert_adapter_io" method="load">
  <var name="type">file</var>
  <var name="path">var/import</var>
  <var name="filename"><![CDATA[importproduct.csv]]></var>
  <var name="format"><![CDATA[csv]]></var>
</action>
<action type="dataflow/convert_parser_csv" method="parse">
  <var name="delimiter"><![CDATA[,]]></var>
  <var name="enclose"><![CDATA[""]></var>
  <var name="fieldnames">>true</var>
  <var name="store"><![CDATA[0]]></var>
  <var name="adapter">catalog/convert_adapter_product</var>
  <var name="method">parse</var>
</action>
```

Then select the 3rd tab 'Run Profile'. Click the button 'Run Profile in Popup', It will execute data import process in a new popup window and will display corresponding message after completing the process.

Now you can check your Products database, the data in the xml will be imported to magento web store.

A history of profile actions to be maintained by using this module also.
